

Dear Scardi Cats,

XM Satellite radio is the best thing to happen to music since the MP3, and Traffic and Weather is the best thing to happen to XM since its introduction. I have found myself many a time wondering what the delay was in many cities and being able to quickly find out. XM is a privligned I pay for and do not take this aspect of it away. I urge the FCC to reject NAB's Petition 04-160.

JOSEPH HANSEN
